DETAILED ACTION

Election/Restrictions

1. This application contains inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

2. Restriction to one of the following is required under 35 USC 121 and 372:

I. claims 1-7 and 11-12 are drawn to a multiplexor, class 370, subclass 474,

II. claims 8-10 and 13-14, are drawn to a decoder, class 725, subclass 143.

3. The inventions are distinct from each other for the following reason:

Invention I is related to a sub-descriptor generating unit, a main descriptor generating unit and a table generating unit and has separate utility from Invention II which is related to a de-multiplexing unit, a information analyzing unit and a data decoding unit.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by

their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. A telephone call was made to Mr. Charles Watts on January 31, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.
